

unplug

for the *holidays*

The U of A Office for Sustainability is sponsoring the 3rd annual “Unplug for the Holidays” campaign. It’s a way to save energy on campus while you are off for the winter break.

before you leave your office or residence hall:

1. **turn off** everything that uses electricity
2. **unplug** your power vampires — equipment that consumes energy even when it’s turned off

power **vampires**

- computers, computer monitors, video monitors
- power strips
- chargers
- space heaters
- office lights
- refrigerators, microwaves, coffee-makers, other small appliances

*empty your fridge before you unplug

“You can think of ‘unplugging’ as your gift to the campus and to the planet.”
