

Purchasing Electronics

It's important to keep in sustainability in mind when purchasing Electronics. For instance: purchasing printers or computers that aren't EnergyStar certified may result in wasted energy. There are a few ways to determine the electronic you're purchasing is sustainable.

What to Look For

- Safe working conditions in all steps of the harvesting and manufacturing processes
- Minimal packaging, ideally made of recyclable or biodegradable materials
- Bulk packaging if ordering multiple items
- Minimized use of harmful chemicals
- Built-in power saving settings
- Consider refurbished models

What to Avoid

- Unnecessary packaging made of non-recyclable materials
- Items packaged individually
- Use of only virgin materials
