

● make the switch

● conserve energy

● save money

WHY IS IT IMPORTANT?

- Producing energy from coal and oil uses non-renewable resources, and releases greenhouse gases into the environment
- Energy from natural resources reduces the amount of greenhouse gases entering the environment

HOW CAN YOU MAKE A DIFFERENCE?

- Turn lights off in empty rooms
- Turn off computer monitors when you leave your desk
- Keep windows and doors closed in air conditioned rooms
- Turn off appliances when not in use
